Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the “mixing tank” and “additional mixing tank” must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

2. Claims 1 – 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fakler (US 5,416,552).

In view of the 35 USC 112 problems, mentioned below, the rejection of record is continued. See the previous Office Action (Paper No. 5) for details.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1 – 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is not clearly understood. The applicant is defining an “additional mixing tank” and “the mixing tank”. The specification only discloses one mixing tank (18) which receives components from the replaceable cartridges (62a, 62b) by way of the supply portion (12) and the solvent from the reception tank (16) and delivers the mixed solution to the storage tank (10). This description appears to be defining what is now claimed as the “additional mixing tank”. The claim states that the “mixing tank” prepares the treatment solution based on the dry components received ... and the solvent received. There does not appear to be any tank accomplishing this task. It is also not clear what is meant by “based on the dry components received from the supply portion. There is no means to determine anything about the dry components. Claims 8 – 10 are not clear. Claim 8 states that “the mixing tank” is emptied into the “storage container”. As stated before, only tank (18) appears to be emptied into the “storage container” (10).

FINAL REJECTION

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
